using tint pacs

Our innovative Tint Pacs are used in a wide range of Acryloc products.

The 40 colours in this selector are inspired by recent trends as well as providing several colours specifically designed for sports courts.

All of these colours are available in durable UV resistant Tint Pacs and many are also available in our heat reflecting Reflectacoat range.

Some popular colours are also available that do not appear on this colour card such as Bronze Olive, Brunswick Green & Dark Chocolate. Other colours are available by request.

Products using UV resistant Tint Pacs:

- Acryloc Commercial Roof Coating System (CRC). CRC is a premium quality roof membrane suitable for metal & concrete, domestic & commercial roofs. Semi gloss finish. All colours are available in the CRC System.
- Acryloc Court Cote Court Cote is a Slip Resistant Sports Court & Pavement Coating for concrete & asphalt. Recommended colours are designated with the Court Cote symbol 

Products using Reflectacoat Tint Pacs:

- Roofcote Supa Cool Our flagship Heat Reflecting Roof Membrane. Semi gloss finish. Tint Pacs designated with the Reflectacoat  symbol can be used in Supa Cool.

Consult our Technical Data Sheets for further information on each product.

Products are fully supported by our warranty.

Of course the product must be used in accordance with our recommendations and we cannot cover damage due to movement or failure of the substrate or structure.

Disclaimer - This card shows examples of colours in a low sheen finish. A different gloss level will alter the appearance of a colour. Factors such as application method, substrate type and ambient temperature can also cause variation. Colour accuracy cannot be guaranteed because of limitations in the printing process.
